

LIZI GORDIASHVILI

Summit, New Jersey 07901 | (845) 430-8685 | lizigordiasvili@gmail.com

OBJECTIVE

Dedicated computer science student who loves turning research into real, working projects — from AI systems to hands-on hardware builds.

EDUCATION

UCNJ

Associate of Science in Computer Science

Cranford, NJ

Expected May 2027

Summit High School

High School Diploma

Summit, NJ

May 2025

RESEARCH & LEADERSHIP EXPERIENCE

NJ Space Grant Consortium (NASA-Sponsored)

Cranford, NJ

Research Intern — AI-Based Lunar Infrastructure Optimization

Sept. 2026 – Present

- Build and evaluate an AI-based optimization system, funded through the NASA-sponsored New Jersey Space Grant Consortium, to inform sustainable lunar infrastructure design.
- Apply computational modeling and optimization methods to reduce projected mission cost and risk in lunar infrastructure planning.
- Develop and test system components independently while collaborating with the Space Grant research team on progress and findings.

UCNJ Independent Research Group

Cranford, NJ

Student Researcher — Generative AI Censorship & Governance

Sept. 2026 – Present

- Conduct compensated, faculty-supervised research comparing censorship and content-moderation practices across generative AI systems developed in China and the United States.
- Analyze model outputs, corporate policies, and regulatory frameworks to assess how national governance approaches shape AI behavior.
- Synthesize comparative findings for presentation to the research group and faculty advisor.

UCNJ Smart AI Assistant Initiative

Cranford, NJ

Founder & Team Lead, AI Academic Advisor Project

Aug. 2026 – Present

- Founded and lead a self-organized, five-member student research group building an AI-powered academic advising assistant for UCNJ students; recruited and now direct the team.
- Secured faculty mentorship by proposing the project to and formally requesting sponsorship from a UCNJ professor, who now advises the group.
- Set research direction and manage the team's progress from concept through an active working prototype, coordinating milestones and technical decisions.

EMPLOYMENT EXPERIENCE

UCNJ Academic Learning Center (ALC)

Cranford, NJ

STEM Tutor

May 2026 – Present

- Tutor students in STEM subjects, developing personalized lesson plans that address individual learning needs and optimize academic outcomes.
- Adapt teaching methods to diverse learning styles, increasing student engagement and comprehension.
- Integrate educational technology into tutoring sessions to strengthen student understanding.

NJ Pathways to Agribusiness Internship

Cranford, NJ

Software Development Intern — Hydroponics Research

May 2026 – Aug. 2026

- Collaborated on the design and implementation of an IoT-based hydroponic monitoring system, programming an ESP32 microcontroller with multiple sensors to wirelessly transmit environmental and water-quality data via MQTT.
- Configured a Raspberry Pi as a local server and built a data pipeline using MQTT, Node-RED, InfluxDB, and Grafana to process, store, and visualize real-time and historical sensor data on live dashboards.
- Wired, soldered, calibrated, and troubleshoot hardware and networking components — including pH and electrical conductivity (EC) sensors and WPA2 Enterprise Wi-Fi connectivity — to improve measurement reliability.
- Helped maintain hydroponic systems by monitoring pH, water levels, and plant health, contributing to a working prototype with continuous environmental monitoring and automated data visualization.

Whole Foods Market

Madison, NJ

In-Store Shopper

Jan. 2026 – Mar. 2026

- Assisted customers in locating products and identifying substitutions, coordinating with team members and using handheld inventory systems to fulfill orders accurately and efficiently.

COMMUNITY SERVICE

SHIP (Summit Helping Its People)

Summit, NJ

Volunteer

May 2024 – Sept. 2024

- Prepared and served meals to community members in need, helping set up and organize the soup kitchen while maintaining food safety and sanitation standards.

SKILLS & LANGUAGES

Technical Skills: Java · Python · C++ · Linux

Skills: Research Design & Methodology · Data Analysis · Problem Solving · Curriculum Development · Lesson Planning · Educational Technology · Team Leadership · Customer Service

Languages: English (Full Professional Proficiency) · Georgian (Native/Bilingual) · Spanish (Limited Working Proficiency)
